

# JOHNSON & JOHNSON (J&J) VACCINE

## TYPE OF VACCINE (1)

- The vaccine is a viral vector, which means
  - The vector is the spike protein of the virus
  - The vector enters the cells in our body and then use the cells' machinery to produce a harmless piece of the virus (spike protein) that causes COVID-19
  - The vector is **NOT** the virus that causes COVID-19, but a different, harmless virus

## WHO CAN/ CAN'T GET IT (2)

- Anyone over the age of 18 years old can be vaccinated
- You **SHOULD NOT** get the vaccine if:
  - If you had a severe allergic reaction to any ingredient in the vaccine
  - If an immediate allergic reaction occurs within 4 hours of getting the vaccine
    - Symptoms: hives, swelling, or wheezing
    - You would need to be treated with an EpiPen
    - Call 911 if you continue to experience the symptoms

## COMMON SIDE EFFECTS (2)

- In the arm where the vaccine was given:
  - Pain
  - Soreness
  - Redness
- The rest of the body:
  - Tiredness
  - Headache
  - Body aches
  - Fever
  - Nausea
  - Chills
