Evidence suggests that people get better protection by being fully vaccinated. Unvaccinated people who already had COVID-19 are more than 2 times as likely than fully vaccinated people to get COVID-19 again.

Reports of death after COVID-19 vaccination are rare. 7,899 reports of death out of 386 million doses given were reported (0.0020%). Most of those that died after the vaccine was due to other underlying conditions.

Concern: The COVID-19 vaccine can kill me. I’ve heard of people dying after getting the vaccine.

Concern: I had COVID-19 and I am immune for life.

Concern: The vaccine was developed too fast so it can’t be safe. They still need to conduct more tests.

Concern: The COVID-19 vaccine can kill me. I’ve heard of people dying after getting the vaccine.

Concern: I don’t know what they are putting in my body; what if I have long-term issues after.

Concern: I had COVID-19 and I am immune for life.
